ABOUT

I am a dedicated and goal-oriented problem solver with over 10 years of experience, primarily in start-ups. I've had the privilege of contributing to and witnessing the exciting growth of companies like IDC/Games, which not only shaped my journey as a senior engineer but also taught me what it takes to build successful IT firms.

I am passionate about continuously enhancing my technical expertise while fostering a professional and collaborative team environment. Now I am looking forward to a new challenge where I can drive growth, make meaningful contributions, and deliver high-quality solutions.

EXPERIENCE

2021 — 2024

Lead Software Engineer · Buink →

- Provided boilerplates with up-to-date stacks
- Distributed and managed tasks for staff members
- Established provisioned workflows and developer conventions
- Build and maintained automated DevOps pipelines
- Conduct code reviews and mentoring
- Reported technical metrics and insights on tasks/projects

PROJECTS

IDC/Games ↗

IDC Games is a multi-language digital PC game distribution platform that integrates user registration, in-game payments, esports, and a loyalty program, for every published game in the platform.

↓ 200k+ installs

Trueview ↗

Our mission in developing TrueView has always been simplicity. We found that traditional budgeting is far too complicated, confusing and time consuming for many people. We also knew that if we could simplify the process, we would significantly increase our users' chances of succeeding with money.

★ 11.3K Followers

TPV ↗

Third Party Verification, or TPV, is the process of having an independent third party confirm the identity of the customer, whether he or she has authorization to place or change an order, and whether the customer comprehends the details.

EDUCATION

DeVry University

GPA 4.0, Grade A

Bachelor's degree in Computer Science
